PRABHAT KUMAR GAUTAM

New Delhi, India | +91 8920272591 | prabhatkumargautam1997@gmail.com
Senior Full Stack Engineer | Laravel | Node.js | TypeScript | React.js | Next.js | AI/LLM | AI Agents | MCP | Redis | Docker | AWS

SUMMARY

Senior Full Stack Engineer with 8+ years of experience building scalable SaaS, AI-powered, and eCommerce platforms. Strong expertise in Laravel, Node.js, TypeScript, React, and Next.js, with hands-on experience building REST APIs, distributed backend systems, and database-driven applications. Experienced in AI/LLM engineering, including RAG, embeddings, tool calling, AI agents, workflow orchestration, and Model Context Protocol (MCP).

CORE TECHNICAL SKILLS

Backend Engineering
PHP, Laravel, Node.js, TypeScript, Express.js, REST APIs, GraphQL, API Architecture, Modular Architecture, Distributed Systems, Event-Driven Systems

Data, Caching & Messaging
MySQL, PostgreSQL, Redis, Elasticsearch, RabbitMQ, Query Optimization, Caching, Queues, Rate Limiting

Frontend Engineering
React.js, Next.js, Vue.js, TypeScript, JavaScript, React Hook Form, Zod, Redux Toolkit, TanStack Query, Tailwind CSS, jQuery

Cloud, DevOps & Tools
Docker, AWS (EC2, S3, RDS), Vercel, GitHub Actions, CI/CD, GitLab, Linux

Testing & Code Quality
Pest, Jest, Vitest, PHPStan, Pint, ESLint, Prettier

AI & LLM Engineering
OpenAI API, LangChain, LangGraph, LLM Tool Calling, AI Agents, RAG, Embeddings, Vector Search, Pinecone, MCP (Model Context Protocol)

Engineering Leadership
Technical Architecture Discussions, Code Reviews, Agile/Scrum, Sprint Planning, Effort Estimation, Team Mentoring

PROFESSIONAL EXPERIENCE

Collectcent, Gurgaon — Senior Engineer (Aug 2025 – Present)

Tech Stack: Laravel, Next.js, React.js, TypeScript, JavaScript, MySQL, Tailwind, Docker, GitHub Actions, CI/CD, AWS

- Leading full-stack development for CoreNeural, an enterprise AI data-protection platform.
- Designed scalable backend rules engine controlling AI model data access.
- Built secure conversational UI and optimized response latency using Redis caching.

Webkul Software Pvt Ltd, Noida — Technical Lead / Senior Full Stack Developer (Apr 2018 – Aug 2025)

Tech Stack: Laravel, Next.js, React.js, TypeScript, JavaScript, MySQL, Tailwind, Docker, GitHub Actions, CI/CD, AWS

Architecture & Backend Engineering

- Designed and built SaaS & eCommerce platforms supporting 10M+ products using Laravel, Redis, and ElasticSearch.
- Architected caching layers, queue workers, indexing pipelines; reduced API latency by up to 50%.
- Developed REST/GraphQL APIs and integrated 3rd-party systems including payments, marketplaces, and AI APIs.
- Implemented rate limiting, throttling, job batching, and performance profiling for high-traffic systems.

Frontend Engineering

- Built reusable Vue.js + Tailwind UI libraries, improving development speed by 30–40%.
- Migrated legacy jQuery modules into Vue components.
- Developed React-based interfaces and contributed to several full-stack feature deliveries.

Leadership & Delivery

- Led engineering initiatives across teams of up to 10 developers, driving architecture decisions, code reviews, and delivery execution.
- Mentored developers and introduced PHPStan and automated testing workflows.
- Collaborated with PMs and clients on requirements, estimations, and sprint execution.

Excellence Technologies, Noida — Junior PHP Developer (Nov 2017 – Mar 2018)

- Contributed to enhancements and bug fixes across client projects
- Developed early experience in PHP, MVC patterns, and backend workflows.

EDUCATION

B.Tech in Computer Science – University of Delhi – 2017
Senior Secondary – Adarsh Vidya Mandir, Moradabad – 2013
High School – Saraswati Vidya Mandir, Moradabad – 2010

LANGUAGES

English – Proficient
Hindi – Native

KEY PROJECTS & ACHIEVEMENTS

Auto Task Agent — AI-Powered Task Automation Platform

- Built an AI agent platform using Node.js, TypeScript, LangChain, and LangGraph.
- Developed CareerSync to automate resume-based portfolio updates using GitHub integration.
- Implemented workflow orchestration, tool execution, validation, and error handling.

AgentLab — AI Agent & MCP Laboratory

- Built an AI agent using Node.js, TypeScript, OpenAI Responses API, and tool calling.
- Implemented agent loops, parallel/dependent tool execution, state management, validation, and error handling.
- Exposed PostgreSQL-backed tools through an MCP server using stdio transport.

Document Retrieval-Augmented Generation API — D-RAG API

- Built a backend-focused RAG API using Laravel and PHP for document ingestion, retrieval, embeddings, and semantic search.
- Integrated OpenAI embeddings with Pinecone vector search to retrieve relevant document context.
- Designed the API around document retrieval and RAG workflows without a chat UI.

CoreNeural – AI Data Protection Platform

- Architected backend rules engine restricting sensitive organizational data from external AI models.
- Integrated OpenAI fine-tuning for domain-specific responses.
- Built secure ChatGPT-style conversational UI.
- Improved model latency using Redis caching.

10M+ Product Dropshipping Platform — dealista.com

- Developed integrations with AliExpress, 1688, Banggood, TVC Mall, Sunsky.
- Designed ingestion pipelines using ElasticSearch & RabbitMQ.
- Optimized backend for millions of product SKUs.

D2C Perfume Website — essenzi.com

- Delivered high-traffic storefront with optimized search and checkout workflows.

B2B Marketplace — drillingparts.com

- Architected vendor workflows, tiered pricing, and complex product flows.

OMS System — Losung (Shipmaxx)

- Built order management system with Shopify integration.
- Implemented dispatch logic, tracking sync, and custom reporting dashboards.

Additional Contributions

- Delivered 70+ modules for payments, logistics, SaaS, POS, and booking.
- Presented at OpenCart Meetup on module architecture.
- Core contributor to OpenCart v3.0.3.7 & v3.0.3.8.
- Built Symfony-based CLI tool for accelerated module development.
